Teaching Toddlers that Abortion is Normal?!!

Education: The book shown on the left, “*What is Abortion Anyway?*” actually never even answers the question in the title. It says that “the pregnancy goes away.”(1) The picture is taken from a Twitter post (included in the article cited) thanking the author for helping her teach her child “that sometimes a body makes a baby and sometimes it doesn’t and none of that is wrong or secret or shameful...” I am horrified to hear one mother state in a comment that her niece loved the book and was reading it to her little sister every night while on vacation. She also stated that “Our family was created by abortion, adoption, and parenting decisions.” How does abortion “create” a family by killing one of its members? Rather than teaching what abortion is, the book hides the ugly truth that it kills a child in the womb but just states that it makes a pregnancy (also not explained) “go away”.

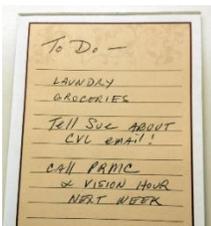

Lila Rose, founder and president of Live Action, considers the real message of the book to be “We took your little sibling and killed her. You’re lucky we didn’t kill you. Now celebrate and affirm the death of your sibling with me.” (1) Another children’s book about abortion was published in 2014. (2) This one tells a story about a little boy who has a “ghost sister” who lived inside his mom for a short time. He explains to his dad that “If you kept my sister, you would be tired, and sad, and mad!...Because we would be wild and loud and sometimes we would fight. Mama might be scared that she could not buy enough food for us. Mama might not have enough time to read to me, to paint with me...” and so he is not sad that his sister is a ghost. (3)

Can you imagine how a child might feel after hearing from their parents that abortion is fine and normal and then learning at an older age what it really is?

Prayer: Dear Father God, please increase the understanding of all Americans that abortion takes the life of an innocent, living child. Help all post-abortive women to get past their denial and accept the truth that abortion killed their child. Help them to come to a sincere repentance and find your forgiveness and healing. Please have mercy on innocent young children who are falsely taught that abortion is normal and acceptable. Help them to find the truth and forgive their parents for misleading them. Help all children to learn the truth of human development inside the womb and the precious value of every person from conception to natural death.

Action: If you or your children are parenting, seek out resources to help inform the children about the fascinating development of young children in the womb.(1) At an appropriate age, also inform them about the reality of abortion and how sad it is that so many people in our country mistakenly believe that it is acceptable.
