## 4 Important Websites to Know About

---

**Education:** The internet is a great source of information. It can be used to educate yourself, and to show others where they can get immediate help, and where they can see the truth about abortion.

**1. The first website - most important to know** - is [OptionLine.org](http://OptionLine.org). This site is available 24/7 with peer counselors ready to listen and talk in English or Spanish. You can read the material, chat online, or call 800-712-HELP. You can use a map to find the pregnancy center closest to you, or the representative can refer you. The peer counselor can talk about the options and help available, the risks of abortion, and how so many women deeply regret making that choice.

**2. The second website** to know about is [AbortionPillReversal.com](http://AbortionPillReversal.com) (APR). If a woman changes her mind shortly after taking an abortion pill, she can save her baby by receiving progesterone from a doctor in the APR network. The procedure is safe and effective with over 5,000 babies alive today who were saved by this treatment.

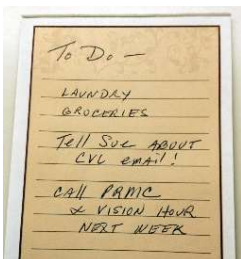

**3. [AbortionProcedures.com](http://AbortionProcedures.com)**. This site features non-graphic drawings to illustrate the various abortion procedures. Many young people have accepted the rhetoric of “my body, my choice” but are not really in touch with the reality of what abortion does. Seeing the killing of the embryo is a powerful tool to help those who are pro-choice to become pro-life.

**4. [AfterAbortion.org](http://AfterAbortion.org)**. This website has an abundance of information on the physical and psychological effects of abortion, and about how many abortions are done under coercion or even forced.

[LiveAction.com](http://LiveAction.com) and [EqualRightsInstitute.com](http://EqualRightsInstitute.com) are two more websites worthy of exploring.

**Prayer:** Dear Father God, please bless the leaders of organizations like Heartbeat International (which operates Option Line and the Abortion Pill Rescue Network), Live Action, and many other organizations which contribute to the pro-life cause. Help them to make wise decisions, to find the staff and volunteers to carry out their mission, and the donors to support their work. Thank you, for calling so many people to contribute to the work of helping pregnant women choose life and changing our society to one which will again consider life to sacred.

**Action:** Advertising costs money, and many women do not know about the help that is available at local pregnancy centers. Let your friends and neighbors know that if they ever know of anyone with a problem pregnancy, the Option Line ([www.OptionLine.org](http://www.OptionLine.org), 800-712-HELP) is a national hotline that can direct callers to the nearest pregnancy center. Familiarize yourself with the other websites listed and take advantage of them both to learn more about abortion yourself, and to share your knowledge with others.
