Eight Blatant Lies of the Abortion Industry: # 4 - 6

---

**Education: Lie # 4: Regret and remorse after abortion is a false claim.**

(1) [AfterAbortion.org](http://AfterAbortion.org) has a wealth of evidence, from decades of research, illustrating the link between abortion and increased risk of depression, alcohol and drug abuse, suicide, and other negative outcomes. (2) Thousands of testimonies from individuals are also

available at [SilentNoMoreAwareness.org](http://SilentNoMoreAwareness.org). A number of organizations are exclusively devoted to providing healing help to women and men who suffer after losing a child to abortion. (3)

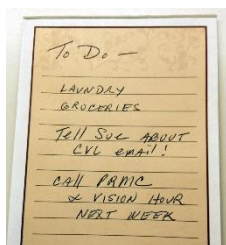

**Lie # 5: Abortion is safer than childbirth.** (4) A large study in Finland found that women who had abortions were three times more likely to die within a year of the pregnancy than women who gave birth. (5)

**Lie # 6: Thousands of women will die if abortion is illegal.** (6) In the 1960's abortion proponents claimed that 5,000 -10,000 women died from illegal abortions every year. Dr. Bernard Nathanson later admitted that the claim was totally false. (7) The annual numbers reported have been below 500 since 1958. (8) .

**Prayer:** Dear Father God, please help the truth to be known about post abortion trauma suffered by not only mothers but also fathers of aborted children, and others involved in the decision. Help people to understand that when deaths from all causes are measured, including violent deaths, abortion significantly increases the mortality risk over the next year. Please guide those suffering to find forgiveness and healing through post-abortion ministries. Help every woman seeking abortion to find the help and loving support she needs to choose life for her baby and never consider an illegal abortion.

**Action:** Tell your friends that you are appalled at the blatant lies being told by the abortion industry and those who support them. Tell them about the lies being told. Post on Facebook or Twitter about it, giving the links to the articles. Tell them that women – and men as well - do suffer after abortion and there is ample evidence to prove it. Before 1973, there were very few pregnancy help centers in the U. S. to help women with the choice of life. Now there are about 3,000. Abortion bans will motivate more women to look for and find the help they need with alternatives to abortion.
