### Eight Blatant Lies of the Abortion Industry: # 7 - 8

---

#### **Education: Lie # 7: Reversing the abortion pill is “junk science”.**

(1) Even the American College of Obstetrics and Gynecology claims that abortion pill reversal is not supported by science. (2) But an actual scientific study showed 64 – 68% success rate and no sign of increase in birth defects. (3) After all, the abortion pill acts against the natural function of progesterone to maintain the pregnancy.

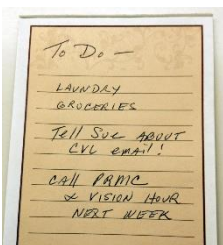

Administering large doses of progesterone, identical to the natural hormone, can overcome the effect of the pill. Progesterone has been used for decades to help women prevent miscarriages. Other studies have confirmed those results, and over 4,000 babies are now (as of December 2022) alive and well after being rescued from the effects of the abortion pill. (4) Two of these precious children are shown above.

**Lie # 8: Banning abortion will inhibit treatment of miscarriages and ectopic pregnancies.** (5) Every state where abortion is banned specifically allows treatment of miscarriages and ectopic pregnancies. (6) Removal of a dead fetus (miscarriage) is not an abortion. Removal of an ectopic pregnancy (when the embryo is developing outside the uterus, where it cannot fully develop) is not an abortion. Both of these procedures have always been legal, since long before laws allowing abortion were passed in the 1960's.

**Prayer:** Dear Father God, please help the truth to be known about the effectiveness and safety of the abortion pill reversal process. With over half of abortions now being done with the pills, help every one of the women who take that step to immediately regret it and act to save their babies. Help every woman and every doctor be well aware that treatment of miscarriages and ectopic pregnancies is still perfectly legal, as it has always been, as in the decades before abortion was legalized. Please call more doctors to be prepared to help women save their babies from the abortion pill.

**Action:** Tell your friends that you are appalled at the blatant lies being told by the abortion industry and those who support them. Tell them about the lies being told. Post on Facebook or Twitter about it, giving the links to the articles. Tell them that abortion pill reversal does work – and over 3,000 babies are now alive because of it. Tell them that the claims in political ads that laws against abortion would prevent treatment of miscarriages and ectopic pregnancies were totally false.
