Reversal of Abortion Pill is Validated

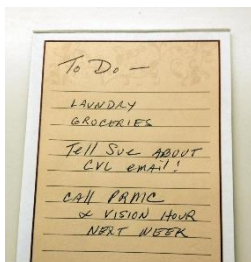

Education: The abortion pill, RU-486, is responsible for a growing number of early abortions, including 11% of Texas abortions in 2015.(1) It can be used up to 9 weeks of pregnancy (7 weeks after conception), and kills the young child by blocking the production of progesterone, which is required to maintain the pregnancy. (2) In 2006, a woman who had taken the pill changed her mind and asked a doctor if he could reverse its effect and save her baby. He reasoned that if the abortion pill acted to block progesterone, large doses of progesterone might be able to offset the effect. The procedure worked. As more and more people heard about it, others tried it too, and an article was published about the procedure in medical literature. The authors also established the web site, www.abortionpillreversal.com, and a hotline, **(877) 558 0333**, where women can get connected to a local doctor who can help them. Over 500 women have now had successful reversals and given birth to healthy babies. (3)

Abortion advocates, however, have referred to the procedure as “junk science” and accused doctors of using women for unethical experimentation. The facts are, however, that progesterone has long been used to prevent miscarriage, and the procedure has been validated by the American Association of Pro-Life Obstetricians and Gynecologists (4) and by the Institutional Review Board of a Florida hospital.(3) A new study shows that the procedure has a 68% success rate if treatment is begun within 72 hours of taking the abortion pill, with no increased risk of birth defects or preterm births. Prayer: Dear Father God, please have mercy on women and girls who are experiencing a crisis pregnancy. Help them to trust in You and to find the support they need to cope with the pregnancy and resist any coercion they may be facing. If they do go so far as to take the abortion pill, please help them even then to regret their decision and desire to reverse it. Keep their precious child alive until they can find the help they need to reverse the effect of the pill. Help them to make a positive plan for the care of their child, and allow the child to survive and grow to be healthy and happy, with a secure home where they are loved and taught to love you.

Action: Spread the word to everyone you know – if someone takes the abortion pill, it is possible to reverse it if they act quickly! Remember the web site – www.abortionpillreversal.com where the phone number can be found to find help. Of course non-judgmental help is available at 800-712-HELP (Option Line) to anyone who is facing difficulties because of a pregnancy.
