This week's Topic: Forgotten Fathers

Education: Although still unknown to much of the general public, the word that women suffer from their abortions is slowly being spread. Less is being said about the effect of abortion on men. Men are less likely to openly express negative feelings, and may express their grief in anger, aggressiveness, and silence.(1) One study showed, however, that 4 out of 10 postabortive men suffered symptoms of chronic post-traumatic stress disorder, occurring on average 15 years after the abortion.(2) Some men become depressed or anxious, others compulsive and controlling. Still others become enraged. Denial of grief can lead to avoidance of

serious, loving relationships.

In one case, 30 years after helping his girlfriend get an abortion, a man's wife insisted that he get help for his anger. Counseling uncovered the abortion as the root cause, which had distanced him from God and affected all his relationships. Participating in a healing program for fathers enabled him to forgive and find forgiveness, and to experience a new joy in life! (3)

The actor and comedian Robin Williams recently died (August 11, 2014) from an apparent suicide. He had apparently struggled with addictions for decades. But did he turn to drugs in part to deaden the pain from the abortion that he and his girlfriend decided on in the 1970's? (4)

Prayer: Dear Father God, please have mercy on men who have lost children to abortion. Whatever their role may have been in the abortion, they have lost a child. Help them to be honest with themselves and to express their feelings in healthy ways. Help them to find healing and be able to participate in truly loving relationships.

Please help all men to look to you for the strength and wisdom to be good fathers to their children, and to freely express their love for them. Help fathers in crisis pregnancies to have the wisdom and strength to accept their responsibilities and show their love for both mother and child by strongly encouraging the choice for life.

Action: Take any opportunity you may have to speak to young men about the wonderful rewards as well as the serious responsibility of fatherhood. If you suspect that a male friend may be suffering from a past abortion, mention to him that you have learned how men can suffer after abortion and that confidential help is available to help men work through their grief.
