You Can Change Minds One at a Time

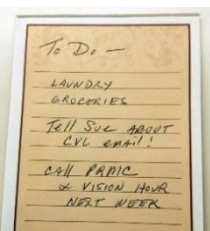

Education: We all know that pregnancy help centers are a key ingredient in the pro-life movement. We need to help pregnant women in difficult situations, and that will not change with abortion becoming illegal. Women will still face difficulties and abortion will still be a temptation, whether by travel or by obtaining pills (or even surgical abortions) illegally. And so, thousands of pregnancy centers around the country – and around the world – will continue to work to help women to have their babies, one at a time.

But it is not just the law that needs changing - it is the culture. The voice of those who think abortion is a woman's right has only become louder and bolder as legal abortion has continued for so many years. We need to also work to change minds. While extremists are loud and bold, many who consider themselves pro-choice have simply accepted the slogans, the "politically correct" view, without truly thinking through the facts and logic. We need to simply have calm, respectful conversations with our pro-choice friends, co-workers, neighbors and families. It helps to establish common ground, such as the fact that some pregnant women face serious problems, and they need and deserve help. Many [conversations on college campuses](#) have been successful, as has been [showing non-graphic abortion videos](#), and a 3 min [video of the development of a baby in the womb](#). We CAN change our country, one person at a time.

Prayer: Dear Father God, please increase the understanding of all Americans that abortion takes the life of an innocent, living child. Help all who are working to promote the availability of abortion to be open to reason, open to the truth of what abortion actually is. Help post-abortive women to get past their denial and accept the truth that abortion killed their child. Help them to come to a sincere repentance and find your forgiveness and healing. Please lead many pro-life individuals to be willing to speak to others in their life who are pro-choice, to help them to accept the truth of the immorality of abortion. Please give our country leaders in both business and in all branches of government who will work to promote the sanctity of life in all circumstances. Have mercy on innocent children who are falsely taught that abortion is normal and acceptable. Help them to find the truth and forgive their parents or others for misleading them. Help all children to learn the truth of human development inside the womb and the precious value of every person from conception to natural death.

Action: Learn about the many resources available to help you become more effective in defending the pro-life position. Check out the videos available from [Live Action](#) and the online materials available from [Life Training Institute](#) (LTI), both available at no cost, and can be watched or read on your own timing. Books available include [Why Pro-Life?](#) by Randy Alcorn, [The Case for Life](#), by Scott Klusendorf, and [What to Say When](#) from 40 Days for Life. Another resource is the [Equipped for Life video course](#) available at Equal Rights Institute for \$49 for a single person, or \$299 for a group of 10, or \$399 for a group of 30. Videos can only be watched online, but audio versions can be downloaded. [See online version for active links.]
