How Many People Have You Shared These Videos With?

Education: Part of the power of the movie *UNPLANNED* was the computer-simulated image of an ultrasound of a suction abortion. It was the trigger that moved Abby Johnson to become pro-life. Abortion is not an “undo” button that somehow makes a pregnancy “disappear.” Abortion is a procedure used to kill a child-in-utero. Many people who had been pro-choice have become pro-life when they see and understand what abortion actually does. In 2016, Live Action partnered with a former abortionist to produce videos describing, with the use of diagrams, various abortion methods. The picture shown to the left is taken from the video describing second

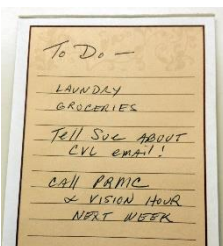

trimester Dilation and Evacuation (D & E) abortion, also referred to as a dismemberment abortion. See www.abortionsprocedures.com for all the videos. A video describing the pill abortion is also included in the set, along with aspiration (or suction) abortion, the most common procedure, used in the first trimester, and induction abortion, used in the third trimester (after 24 weeks). Other videos available have interviews with Dr. Levatino, including one in which he describes why abortion is never necessary to save the life of the mother.

Live Action has shown these videos to people on the street, and several who first described themselves as pro-choice immediately changed their mind after watching the video. A national survey of “pro-choice” women who watched one of the videos demonstrated that 32% said that the videos caused them to view abortion “less favorably”. (1) The videos have been viewed over 42 million times, but there are still many people who have not seen them. Have **you** seen them? How many people have you shared them with?

Prayer: Dear Jesus, please help Americans to be willing to look at the truth of what abortion really is. Help these videos to allow many pro-choice people to understand what abortion actually does as it destroys a child. Help parents to be wise in telling their children about abortion, and even showing them the reality, just as we educate our children about the Holocaust and war. We pray for mothers tempted by abortion to realize the truth of the humanity of their child and to find the courage, support and grace they need to choose life.

Action: Go to www.AbortionProcedures.com to watch the videos. Share them on Facebook and Twitter. Tell your family members and friends about them. Ask your pro-choice friends if they have ever actually seen what abortion looks like, and be prepared to show the videos on your phone or tablet. You can also go to the Priests for Life web site (2) to see pictures of both children in the womb and the disturbing aftermath of abortion.
