Lives are Being Saved!

Education: "The fear I had of being pregnant overcame all other emotions, and I took the pill. On the drive home I was consumed with guilt and regret. I cried the whole way home..." Emily, age 19. Fortunately, Emily looked online, found the Abortion Pill Reversal network, and less than 12 hours after she took the abortion pill, she started the reversal process. She now considers her son the best thing that ever happened to her. (1)

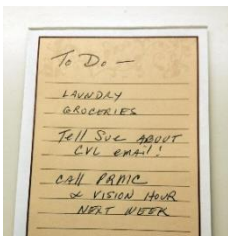

Medication abortions were used for more than 1/3 of all abortions in the U. S. in 2017. (2) It can be used up to 10 weeks of pregnancy (8 weeks after conception). The first step of the procedure is to block the action of progesterone. The second step is to induce contractions and expel the dead child. After the first step, the process can be reversed by administering large doses of progesterone within 72 hours. Since its inception in 2007, over 1,000 babies have been born after being rescued by abortion pill reversal, which has a 64-68% success rate, with no increased risk of birth defects or preterm births. (3) Women can get connected to a local doctor through the web site, www.abortionpillreversal.com, or at **(877) 558 0333**.

Rita and her fiancé also chose abortion and she took the pill. But during the 3 hour car drive home, Rita began to bleed heavily (a possible side effect of the abortion pill). They went to a hospital where Rita was given a blood transfusion and monitored. After learning that she was still pregnant and her baby had a heartbeat, Rita went through the reversal procedure and now considers her son her biggest blessing.(4)

Prayer: Dear Father God, please have mercy on women and girls who are experiencing a crisis pregnancy. Help them to trust in You and to find the support they need to cope with the pregnancy and resist any coercion they may be facing. If they do take the abortion pill, please help them even then to regret their decision and desire to reverse it. Keep their precious child alive until they can find the help they need to reverse the effect of the pill. Help them to make a positive plan for the care of their child, and allow the child to survive and grow to be healthy and happy, with a secure home where they are loved and taught to love you.

Action: Spread the word to everyone you know – if someone takes the abortion pill, it is possible to reverse it if they act quickly! Remember the web site – www.abortionpillreversal.com where the phone number can be found to find help. Of course non-judgmental help is available at 800-712-HELP (Option Line) to anyone who is facing difficulties because of a pregnancy.
