### Powerful Short Film about Standing Up for Life

---

**Education:** During the Nazi rule of Germany, millions of Jews were herded into concentration camps and killed. Some good Christians in Germany and other countries in Europe risked their own safety in order to hide Jews or help them to escape. Others... did nothing. Some were not aware of what was happening; they thought the Jews were being transported to labor camps or deported. But some were aware, and still did nothing out of fear for their own safety. (1) When children learned about the Holocaust years later, did they ask their parents or grandparents “What

did you do when all those Jews were being killed?”?

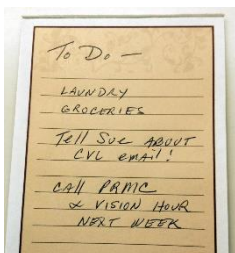

The Jews were often transported by train in cattle cars. One train passed by a small church every Sunday morning, and one morning it broke down just outside the church. Good Christians could hear cries from the frightened Jews when the train came to a sudden stop. How did they react? Watch this film, based on a true story. It is called “Sing a Little Louder”. (2)

The film is only eleven minutes long, and is available for free downloading to show to church audiences. When our country once again returns to protecting life in the womb, will our children or grandchildren ask, “What did you do during that time when abortion was legal and so many children were being killed?” What will we tell them?

**Prayer:** Dear Lord, please give all your children a spirit of courage to stand up for the innocent children who have no voice, the children who are being killed because they are perceived as a burden rather than a gift. Help every Christian to be aware of the terrible toll abortion is taking on our country, with so many lives being lost, and so many women being wounded. Give pastors and ministers courage to preach the truth about abortion in the face of powerful voices in the church who do not wish them to speak. Call many Christians to be a part of the pro-life movement to educate, pray, and act to move our country and our world to greater respect for life in the womb.

**Action:** Talk to your pastor about showing *Sing a Little Louder* in your church. Or perhaps there are other ways that you can work to educate your church community and encourage them to get involved in working toward protecting children in the womb and helping women facing difficulties to resist the temptation of abortion. See [Respect Life Church Ministry](#) for information about how to start a pro-life ministry in your church.
